Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 May 2006 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by US 2,911,605 (Wales).

Examiner notes that the limitation “configured to be transported in a predetermined direction” is not a positive limitation but only requires the ability to so perform. (See *In re Hutchison*, 69 USPQ 138). Thus to anticipate the instantly claimed invention, a prior art device only needs to have the ability to be transported in a predetermined direction to meet this limitation.

Wales discloses, referring primarily to figure 4, a stock sheet for a multilayer flexible wiring board comprising: a flexible sheet-like substrate (2, col. 2, lines 1-10)

Art Unit: 2841

configured to be transported in a predetermined direction (e.g. into the page as depicted in figure 3) and a plurality of wiring patterns (L3, L4) directly arranged on a same surface of the substrate in a direction perpendicular to the predetermined direction, wherein the plurality of wiring patterns correspond to individual layers of a multilayer flexible wiring board (col. 2, lines 15-35) [claim 1].

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents discloses multilayered substrates:

US 2,014,524	Franz,
US 3,409,732	Dahlgren et al,
US 3,780,431	Feeney,
US 4,681,656	Byrum.
